Dear Tom,

Looking over some material from molly Squire, re Seckel, and letters re Al, I thought I should thank you for your efforts in further exposing him over the years. As you might recall, I hated his guts for a long time and felt he was a phoney. I started the expose when I heard he was to be on KFI radio, as a

"PhD student".

I called Al, asked him where he was a grad student in Physics, and he said a "large university in the LA area."

So, I called all of them, and none knew of him.

On radio, (I had warned KFI) someone else challenged him and he backed down to saying he "only had a Master's degree". I called him again, and he said the master's was from a large University in the LA area. Same result when called. Zero.

I passed this all on to Jim Moseley, and of course you further checked into his Cornell and Cal Tech claims. Zero.

I called Al up again, and challenged him to offer any proof of ANYTHING, and then I told him flat out that he was a liar and a fraud. He reacted like a trapped weasel, lashing up out blindly, snapping and snarling.

I thank you for finishing him off and getting him out of CSICOP.

Sincerely,

Erik Beckjord
